

ORC TRACKER INFORMATION

Each boat will receive 2 trackers - one mobile network and one satellite.

Turn on

- Satellite Tracker (Garmin)
 - This device must be turned on between **0700-0800 on Monday, September 30.**
 - Press the small on/off button on the right side of the device. Release the button. The Garmin logo will appear on the display which signals the device is on.
- Mobile Network Tracker (has a 4-digit label)
 - This device has already been turned on and does not need anything further.

Placement

- Both trackers must be mounted vertically to a railing at the stern of your boat. Use the carabiner to attach and secure with the cable tie to prevent the device from moving around.

Next Steps

- Both trackers must be returned at the end of racing on **Wednesday, October 2** to the NYYC Sailing Office for charging.
- Trackers must be re-collected **Thursday, October 3** between 0730-0900.
- Upon pick up on Thursday, the devices will all be turned on already so you only need to mount in place.
- At no time should you ever turn either device off.

End of Event

- Following racing on **Saturday, October 5** all trackers must be returned to the NYYC Sailing Office and marked as received.

Questions?

- Contact the Sailing Office with any questions – 401-845-9633
